[About Me](#)

## Learn English Online!

This is a free online English learning website with a main focus on vocabulary.

Vocabulary learning is very important in language acquisition. By "vocabulary", I mean not only single words, but more importantly, **phrases** such as fixed expressions, phrasal verbs, collocations, idioms, and so on.

This website contains mini self-study lessons on [idioms](#) and [phrasal verbs](#). There are also many [useful expressions](#) arranged in accordance with their functions. In addition, I have put together some lessons on [confusing words](#) - words that many English learners find difficult to distinguish and use. Finally, there are some short [reading comprehension lessons](#) featuring Canada and different festivals around the world.

This website is not yet finished (it never will be!). I am planning to add new lessons to the existing sections above from time to time, so please be sure to bookmark this site and return as often as you want.

I also have an [Online English blog](#) in which I write about different things, such as learning English, interesting stories, news articles, etc. I use simple English and introduce common English phrases and expressions in the blog. Please feel free to visit and post a comment or two!

Please tell your friends or anyone you know who is learning English about this website.
